SUMMARY

Currently I'm pursuing a Master's degree in Cloud Computing/Technology, I've foundational understanding of networking and IP protocols. Passionate about the potential of **AWS**, **Microsoft Azure**, and **GCP** cloud technologies and willingness to contribute to innovative cloud-based solutions. Seeking an opportunity to apply my growing knowledge and experience skills within a dynamic cloud environment.

CLOUD & INFRASTRUCTURE SKILLS

Web Technologies & Frameworks: HTML5, CSS3, JavaScript, Bootstrap, React.js (Basic), Tailwind CSS, GSAP, WordPress, Web Designer – [UI/UX] Laravel, Java, REST- APIs.
Networking & Hardware: TCP/IP, DNS, DHCP, VLANs, Firewalls, Routers, Switches (Cisco), PC troubleshooting,

Installation & Configurations Software: Microsoft Office 365, Virtualization (VMs, VirtualBox Setup), H – Hypervisor-V, CUCM (VoIP), ESXi.

Programming & Scripting: Python (Basic), C/C++, PowerShell, Bash (Scripting), CMD, CLI.

Databases: Django (Basic), MySQL, PostgreSQL (Basic), MongoDB (Basic), Cosmos DB.

Tools: Git, GitHub, Git-Lab, Visual Studio Code, Cursor, MySQL - Server Management System, npm, yarn.

Cloud Platforms: **AWS** (IAM, MFA, EC2, S3, RDS, VPC, ELB, CloudWatch), **MS Azure 365**, **GCP** , Heroku.

Operating Systems: Windows (Client/Server), Linux/Unix (Red-hat, Ubuntu, CentOS, MintOS).

Other Skills: DSA, OOPs, Printing, Active Directory Domain Controller, Cisco (Packet Tracer), G.N.S., Telnet.

EDUCATION

- M.Sc. I.T. IMS & Cloud Technology Gujarat University, Ahmedabad, Gujarat.

Course Duration | *2024 – 2026.*

- Bachelor of Computer Application | Lokmanya Collage of Computer Application, Gujarat University.

CGPA: **5.9 / 10 |** *2021 – 2024.*

- Higher Secondary Certificate (**XII**) - Board: GSEB, *2021 — **Passed.***
- Secondary School Certificate (**X**) - Board: GSEB, *2018 — **Passed.***

ACADEMIC PROJECTS

Semester 3: Cloud Security Implementation & Compliance using AWS

Designed and implemented a comprehensive cloud security framework on AWS, covering identity & access management (IAM), security group policies, encryption, compliance auditing, and monitoring using AWS CloudTrail, Config, and Security Hub to ensure regulatory compliance.

Services Used: AWS IAM, AWS Security Hub, CloudTrail, AWS Config, Compliance.

Semester 4: AI-Driven Serverless Vision – Automated Image Analysis & Metadata Extraction in Azure

Built an AI-powered serverless pipeline on Microsoft Azure that automatically analyses uploaded images using Azure Computer Vision (Cognitive Services), extracts meaningful metadata, and stores results in Azure Cosmos DB — all orchestrated via Azure Functions with a fully serverless, event-driven architecture.

Services Used: Azure Functions, Computer Vision API, Cosmos DB, Blob Storage, Serverless.

WORK EXPERIENCE

IT - Device Management Service Executive,

Currently Working at IMRB - Hindustan Thompson Associates Pvt. Ltd.

Roles & Responsibilities:

- Manage and support end-user devices across the organization, ensuring smooth operation and compliance with company policies.
- perform device enrollment, provisioning, configuration, and lifecycle management for corporate device.
- Monitor device health, troubleshoot issues, and coordinate resolution of hardware, software, and connectivity problem.
- Ensure security controls are applied to devices, including policy enforcement, access protection, and compliance settings.
- Support installation and updates of approved applications, drivers, patches, and related software components.
- Work with internal teams and vendors to resolve device-related incidents and service requests in a timely manner.
- Maintain records, reports, and documentation for device inventory, support activities, and issue tracking.
- Assist in maintaining smooth IT operations by supporting users and ensuring device availability for business continuity.

CERTIFICATIONS

➢ **Cyber Security Essentials (E-Certificate)** | **Cisco Networking Academy (E-Course)** | ***2022.***
